Experience

Freelance Software Engineer

DECEMBER 2021 - PRESENT

Freelancer, specialised in **web and mobile application development**. My main responsibilities are: **communicating with clients, architecture planning, building the application**.

- React
- Next.js
- Vue.js
- React Native
- NestJS
- Express
- MongoDB
- TypeScript

Cogito Technologies Kft.

JUNE 2021 - AUGUST 2022

Hungarian Startup University Program - I have contributed to the development of an **E-learning platform** that is accessible both on web and mobile. The platform provides courses on creating a business, startup principles, and entrepreneurship, and is exclusively available for university students.

- React
- React Native
- NestJS
- MongoDB
- TypeScript
- CSS

EDMdesigner

JULY 2018 - SEPTEMBER 2018

Chamaileon - Created automated tests for the site.

- JavaScript

Cargo-Viszed Kft.

JUNE 2021 - DECEMBER 2022

ViddL - I have contributed to the development of a **Last Mile Delivery Application**. The application includes a web application for uploading, managing, and assigning packages to couriers. It also has a **mobile app** to assist couriers with handling deliveries.

- React
- React Native
- Next.js
- NestJS
- MongoDB
- TypeScript
- CSS

EDMdesigner

SEPTEMBER 2018 - JUNE 2021

Chamaileon - Developed a responsive, real-time **email template builder** with a **drag and drop surface**. **Rest API** and backend maintenance. Built a **Single-Page Application** and **Micro Frontends** for SDK. Contributed to a web **payment system**. Implemented **Amazon Cognito** for user authentication.

- Vue.js
- Express
- MongoDB
- JavaScript
- CSS

Hobbie Project

MARCH 2011 - OCTOBER 2016

GTA SA:MP: Created an online GTA San Andreas Multiplayer **game server** where players can connect and play with each other. Added **Control panel** on the web, to let users manage their in-game account. **Learnt the basics of programming**.

- Pawn
- CSS
- PHP
- MySQL
