EXPERIENCE

Digital Thinkers (Agency)

Senior Full Stack Developer

Budapest

MAY 2023 - Present

- Learned PHP and used the Laravel framework to build an API for a Danish business management tool that assists in creating sustainable strategic plans and prioritized action plans
- Took on the Lead Developer role, which entailed engaging in client and partner discussions, handling frontend development, and successfully executing data migration for a seamless system transition
- Contributed to the development of an API for a Danish education platform, facilitating seamless user registration and course payments. Implemented synchronization between CMS and API, integrated CRM functionalities, and successfully launched the API live

Full-time Freelancer

Full Stack Developer

Remote

DECEMBER 2022 - APRIL 2023

- Developed a single-page drag-and-drop story writer application by designing its architecture and utilizing React, NestJS, React Query, JWT, and REST API.
- Played a role in maintaining a large custom CMS that was constructed with Gatsby and GraphQL
- Constructed a Single Page Application using React and React Query for a data collaboration company that prioritizes privacy

ViddL

Full Stack Developer

Budapest

JUNE 2021 - DECEMBER 2022

- Utilized Nest.js and MongoDB to develop a notification service for notifying parcel recipients through Messenger, Email, and SMS.
- Developed a parcel tracking site using Next.js SSR
- Optimized the client-side PDF rendering process in React by using Web Workers
- Developed a courier mobile application using React Native
- Created a React-based admin dashboard for managing parcels, couriers, and processing CSV files

Cogito Technologies

Full Stack Developer

Budapest

JUNE 2021 - AUGUST 2022

- Developed static landing pages for multiple companies with the use of Gatsby, Next.js and serverless functions
- Collaborated on both the frontend and backend development of an e-learning platform, using React, React Native, NestJS, and MongoDB.

Chamaileon
